WORK EXPERIENCE

Software Developer Damacloid Technologies

05/2019 - Present

Mumbai

Service based Software Company

Achievements/Tasks

- Part of the development team responsible for the creation of **Assurekit** (An Insurance Lifecycle Management Application).
- **Assurekit** is a process lifecycle management software build for insurance industry. It is a no-code platform which can help users create user journeys to distribute and service insurance programs.
- Developed Assurekit, completed Security testing and also resolved all the security vulnerabilities. Helped Assurekit to get CERT-IN Security Audit certificate from Security Brigade.
- Assurekit Tech stack: React js, Spring boot, Mongodb, Mysql, Redis
- Worked on **Jsodev**, which is an Internal Team management tool.
- **Jsodev** includes features like Team chat, Individual chat, Task and Appointment scheduling.
- Jsodev Tech stack: Mongodb, Express js, React js, Node js
- Build **Cymmetri** Authenticator app in React Native for both Android and iOS.
- The above app generates Time based OTP for login and also has Push Authentication service for service access.
- Cymmetri Tech stack: React Native, Spring boot, Mysql
